

PRE-ANNOUNCEMENT

Sustainable Hydrogen Technology as Affordable and Clean Energy

What is the aim of the call?

The **Sustainable Hydrogen Technology as Affordable and Clean Energy** call aims to contribute to building a better society, and help mitigate climate change and other environment impacts caused by ever-growing human reliance on energy by inviting research teams from Europe and Japan to collaboratively explore new sustainable hydrogen technologies.

The Joint Call Text and Submission process is available on the **EIG CONCERT-Japan website**
concert-japan.eu

What is EIG CONCERT-Japan?

EIG CONCERT-Japan is an international joint initiative to support, coordinate and enhance science, technology and innovation (STI) cooperation between European countries and Japan.

Conditions

Research projects with an innovative dimension will be funded for a period of three years in the field of sustainable hydrogen technology. The research projects are expected to have mobility and networking dimensions apart from the core research component. Each project consortium applying for this call should consist of at least three (3) partners, including one (1) from Japan and two (2) from two different European countries participating in the call.

The Joint Call will be funded by the budget allocated by each participating national/regional funding institutions. Therefore, **each participating funding organisation reserves the right to apply its national/regional funding regulations.**
